

FleetIQ Maintenance Checklist

Short Term Check-Ups

- Check oil and coolant levels regularly.
- Inspect air filter for blockages and replace if necessary.
- Check tire pressure and tread depth monthly.
- Inspect headlights, turn signals, and brake lights.
- Change oil and filter according to the manufacturer's recommendations.
- Rotate tires as needed.
- Wax vehicle every six months to protect the paint.

Long Term Check-Ups

- Inspect transmission fluid and change as needed.
- Check transfer case fluid for 4WD or AWD vehicles.
- Inspect shocks and struts every 50,000 miles.
- Flush and refill coolant fluid as per the schedule.
- Inspect and replace spark plugs as recommended.
- Inspect the serpentine belt and replace if necessary.
- Check and maintain front/rear differentials based on manufacturer recommendations.

Seasonal Check-Ups

- Replace windshield wipers annually or as needed.
- Test battery performance before winter.
- Switch to winter tires in cold climates.
- Check coolant levels for antifreeze protection during winter.
